

Sprint Review 2

Nick Chaney

Objectives during this sprint

- Narrow down essay topic
- Figure out what methods to use
- Find Sources that support these methods

Narrowing the Topic

- Originally my topic was “How Collective Action Contributes to Climate Change”.
- As you can see this is very broad
- I have thought very hard about how I could narrow it and came up with a new topic
- My new topic is “How would the climate be affected if everyone stopped driving gas running cars?”
- Thoughts on the new topic?

Methods

- Get data on pros and cons of both gas and electric cars
- Get data on the realisticness of getting people to do this. Maybe if it was even for just a city?
- Getting arguments from both sides on why they would or wouldn't switch to electric cars

New sources

- “The environmental and financial implications of expanding the use of electric cars - A Case study of Scotland”
- Shows the effects of expanding the use of electric cars, mainly focuses on the environmental impact
- “Direct and cross price elasticities of demand for gasoline, diesel, hybrid and battery electric cars: the case of Norway”
- Shows the financial impact of electric cars and gas cars
