

Sprint Review 3 (Results)

By Malcolm Howard

Objective

- Display my results
- Finally have a topic
- Show how I used the methods

Last Sprint Review

- On the last sprint review, I explained what my topic would be and the methods I would use to get the results for my topic. I came to find out that the narrowed down topic I came up with was still too broad for me to go into full detail on it.

Accomplished/Results

- So I was not able to come up with any results because I am still in search for a topic that will suit me and be able to do research on it. Also, having this topic in another one of your courses was not helping as I thought it would so it is best for me to change.

Next Review

- Finally find a topic
- Get results/have a method
- Start and finish my paper
- Do a literature review
