Protocol (October 26, 2021)

By Fortunato Hernandez, aka "The student"

This was the 11th week on the course.

Sources

- Lecture
- Video (Introduction to BPMN)
- Github (Agenda)

Housekeeping

- Graded test (Process/modeling/EPCs)
- EPC practice with diagrams in Signavio:
    Students shared their Signavio files and discussed.
- Video tutorial:
    We saw a video of introduction to BPMN.

Session Topic: Business Process Model and Notation (BPMN):

We learned the definition and how to use it.

Professor Marcus show us the four main group of forms in BPMN and also gave us an example where he modeled eating ice cream.

Summary

In my opinion this is a really helpful method to model processes. I am pretty sure that learning this will be helpful in my professional life in a future. I found EPCs easier than BPMN, but I am getting better as we practice it more in class.
